BIP – Blended Intensive programme

Chieti, 2nd May 2024

Invitation

I have the pleasure to invite you to our Blended Intensive Programme that will be held in September 2025 in Chieti, at the University G. d’Annunzio Chieti-Pescara.

«**Gabriele d'Annunzio**» **University** has two branches, one located in Chieti and the other in Pescara and was named after the famous writer from Abruzzo, Gabriele d’Annunzio.

The University hosts **fourteen departments and two schools**, one located in Chieti’s campus (the legal branch of the University where the administrative and general directorate offices are located) and the other one in Pescara.

Regarding the Campus in Chieti, it is an American style campus. Surrounded by greens, it offers many facilities and services accessible by the wider public, recreational and sport grounds: beyond a Life path it provides several sport facilities (basket, volley, tennis).

The University has more than 26.000 Students and 700 Professors and is in a beautiful Region in central Italy, Abruzzo, that has two souls and one heart. Predominantly mountainous and hilly, it overlooks a beautiful stretch of the Adriatic Sea. Here, you will find the highest peaks of the Apennines, such as the Gran Sasso and the Majella massif, as well as the only Apennine glacier, but also some of the most popular beaches.

In addition, to the limpid waters and postcard views, the trabocchi, or “trabucchi”, are undoubtedly the elements that most characterise the Abruzzo coast, particularly the Teatina coast, or rather that belonging to the Province of Chieti.

The learning activity is structured following the innovative framework of Erasmus+ Blended Intensive Programme (BIP). It combines various formats that facilitate the acquisition and deepening of knowledge and skills:

- 1) **In-Person Intensive Programme:** the first part of Blended Intensive Program will be held on September 2025 (8-14 september). During this week the students will have the opportunity to participate in several face-to-face teaching and learning, enjoy several social visits (see the Trabocchi coast, go to the beach, visit downtown...). On the last two days they will have also the opportunity to participate on an International

Workshop. Moreover, will experience the use of Virtual and Augmented Reality devices.

- 2) **e-learning platform (“Virtual”)**: the students will have additional online sessions where live surgery will be held. The main objective of the *Blended Intensive Programme* is to carry out an international study experience and develop technological competencies with the most advanced technologies nowadays available in the dental and medical field.

The title of the programme is: **“Biomaterials and 3D printing for therapeutical applications”**.

Attached, please, you can find the detailed proposal.

Looking forward to seeing you in Chieti!

The coordinator

Prof. Bruna Sinjari
