## ALL-TERRAIN INDUCTION

### Business :

ID partner is a VSEs\* located in Grenoble designing, manufacturing and marketing induction electrothermal systems.

We are a team of 6 people with projects often innovative and original. We work for very diverse fields such the recycling of waste, the assembly of the reactors of the Rafale, cosmetics with L'Oréal, the medical with Microport (Memphis), the food industry with Andros as also the university world and research (INSA, ESRF, ILL, Jussieu ...).

### Mission:

Electromechanical design (mechatronics) of our new induction generator, more specifically for the world of forging or interventions on building site, by integrating technical constraints (EMC, cooling ...), customer (easy to use, easy to install. ..), sale ("pretty and nice" ...), production (easy to assemble) ..., and financial.

We offer you the opportunity to realize a project with a "real" purpose, contacts with suppliers, customers and partners, full integration to the project group, participation in the development of the business plan associated with this new product.

Permanent contract possible at the end of the internship.

### Required profile :

You have always been passionate about science and technology,  
You are not afraid of challenges and you give the maximum to make projects successful,  
You know how to work in groups: to listen, to take into account remarks, to share.

Deadline for application: 31/01/2019
